Kanstantsin Gerasimovich

Software Development Engineer at Amazon Web Services (AWS)
Seattle, Washington

Общие сведения

Talented Software engineer with a passion for web development, distributed systems, and cloud computing.

Able to address complex architectural problems with the simple, intuitive design.

Flexible, detail-oriented problem solver, self-motivated and interested in progress.

Опыт работы

Amazon Web Services (AWS)
Software Development Engineer
апрель 2019 - Present
Greater Seattle Area

Reputation.com
Software Engineer
январь 2018 - март 2019 (1 год 3 месяца)
San Francisco Bay Area

Responsibilities: Build high-performant, scalable, and reliable backend services in the cloud. Participate in the full lifecycle of software development (requirements gathering, designing, building, testing and maintenance).

Accomplishments:

- Built monitoring and alerting system for a highly distributed application.
- Improved scalability and reliability of data-intensive architecture by using asynchronous approach.
- Updated the existing platform to the latest cutting-edge technologies to ensure the highest quality product.
- Shared the knowledge about complicated system internals by giving lectures for the engineering department.

EPAM Systems
Software Engineer
февраль 2017 - август 2017 (7 месяцев)
Minsk, Belarus

Responsibilities: Work in an Agile team, design, and development reliable, scalable, and maintainable system based on the microservice architecture in the cloud (AWS).

Accomplishments:

- Fixed performance issues within the entire system, which allowed to be prepared for the Alpha release of our product in time, entailed in big customer's satisfaction.
- Implemented distributed ETL system in the cloud.
- Was a leading developer in a small team and was engaged in mentoring of junior co-workers.
- Learned how to apply the agile methodologies in software development.

ITA (Belarus)

Software Engineer

февраль 2016 - февраль 2017 (1 год 1 месяц)

Minsk, Belarus

Responsibilities: Design and development server-side and UI, implementation business logic and data model, improving performance, fixing issues, communication with customers.

Accomplishments:

- Learned and applied best practices in software design and engineering.
- Created full life cycle of high-priority business features (Payments, Notifications).

Helmes AS

Test Automation Engineer

август 2015 - февраль 2016 (7 месяцев)

Minsk, Belarus

Responsibilities: Development and maintenance auto-tests using Ranorex.NET, configuration regression testing on Jenkins.

Accomplishments:

- Designed software testing solutions driving continuous improvement to the system.
- Built automation framework for UI testing (functional, regression).
