Darshan Shah

Software Quality Assurance Engineer at Amazon Lab126
Sunnyvale, California

Summary

Software Manual / Automation Engineer performing functional, regression, UAT testing procedures for web , IOS and Android apps to ensure that all errors are identified and corrected before released to the clients. My in-depth experience has helped me gain knowledge of standard QA methodologies and Software Development Life Cycle (SDLC) including Waterfall and Agile methodology. From my previous experience, I have gained unique abilities in field of Business Administration, Benefits Planning, Strategy Development and an understanding of organizational strategies to help meet corporate objectives.

Here is my brief professional Summary:

• Accomplished Quality Test Engineer with a total of 3.5 years of experience.
• Extensively involved in Manual Testing and Automated Testing.
• Good Experience on Appium, Android Studio, Xcode, Selenium , Test Complete and creating automation scripts
• Experience in Web, desktop and mobile based testing including GUI Testing, Regression Testing, Integration Testing, System Testing, Performance Testing, Stress Testing, Functional Testing and Unit Testing.
• Experienced in developing automated tests from Test Plans, Test Scenarios/Cases, Test Suites and Bug Reports using automation tool such as Test Complete.
• Rich exposure to Software Development Life Cycle and Testing Methodologies and experience in Requirement Analysis, Impact Analysis, defect fixing and testing.
• Expertise with CI tools such as Jenkins.
• Proficient in all phases of Test Life Cycle from test planning to defect tracking and managing defect lifecycle.
• Strong ability to gain knowledge through self-learning and hands on exploration.

• Excellent team management skills with good communication and interpersonal skills.

___

Experience

Amazon Web Services (AWS)
Software Quality Assurance Engineer
October 2017 - Present
Sunnyvale, CA

EPAM Systems
Software Test Engineer @ Google
May 2017 - October 2017 (6 months)
Mountain View, California

As part of Google Cloud Support Applications team i was responsible for test plan creation, writing test cases, creating test strategy, reviewing and executing new features to support product roll outs for Google businesses. Collaborated with developers to address product defects, understand new features and add it to existing test suites.

Ooyala
Software Functional Tester
October 2016 - April 2017 (7 months)
San Francisco Bay Area

Ooyala has an end-to-end solution to manage, publish, measure, personalize and monetize your content using our premium video platform. Working as a QA Engineer for the Web and SDK releases, which occurs every three weeks.

Tools: Charles Proxy, Appium, Android Studio, ADB tools, Xcode, VMware Fusion, Internal Data Analysis Tools, JIRA, IntelliJ, UiAutomator, Junit, Other internal testing related tools

Facebook
QA Engineer (C)
May 2015 - September 2016 (1 year 5 months)
Menlo Park, CA

Facebook is the most downloaded app on the Play store. Worked as a Mobile QA Engineer for the Facebook app on Android and iOS devices. Performance and reliability are top priorities across Android, but when we marry the platform's diversity of devices and OS versions with Facebook scale, the ability

to test quality across experiences can become a challenge. We have moved from two-week release cycle to one-week release cycle and our mobile team is constantly verifying fixed issues, testing new features and shipping updated versions of app.

Tools: Android Studio, Eclipse, ADB, Appium, GitHub, Robotium, Scuba, MyDomino, Internal Data Analysis Tools, Charles Proxy, WireShark, Junit

Agilent Technologies
Software Automation Engineer
November 2014 - April 2015 (6 months)
Santa Clara, CA

Appointed as automation test engineer, offering me vast opportunities for system testing and implementing tools and frameworks to automate testing of OpenLAB Laboratory Software Suite designed to integrate and manage scientific information throughout its life-cycle, across the laboratory.

Environment: Windows XP/Vista/7, Smart Bear's Test Complete, Jenkins, Git Extensions, VSphere,GUI-based test automation frameworks using .NET (C#)

Intuitive Surgical
Software QA Tester
July 2014 - October 2014 (4 months)
Sunnyvale, CA

Currently working as part of team at Intuitive Surgical performing functional, regression, UAT testing procedures for web and IOS app to ensure that all errors are identified and corrected before released to the clients.

Advance Response, LLC

San Jose, CA

• Assisting with software requirements elicitation, coding, and testing of software applications for the medical billing industry.
• Automate test cases using Selenium Web Driver.
• Logging defects in Bugzilla and handle bug life cycle.
• Hands on experience in MySQL, PuTTY
• Technologies utilized: MySQL, Notepad ++, PHP, Selenium, Bugzilla, Testopia.
• Ensuring code quality to aid in successful product release.

• Assisting with software requirements elicitation, coding and testing of software applications for the medical billing history.
• Outline test plan and cases.

MetWest Terra Hospitality
Guest Services Supervisor
October 2010 - August 2013 (2 years 11 months)
Teton Village, WY

• Assisted Front Office manager in all aspects of Front Desk Operations, including setting up Cloud Login Credentials for new users.
• Responded to guest requests and also provided quality and accuracy to daily functions of the rooms division department.
• I supervised performance, attendance, appearance and conduct of staff.
• I also made sure our department cooperated with Sales, Engineering, House Keeping and Security departments to ensure guest satisfaction.

Bay Leaf Bistro
F&B Manager
March 2010 - November 2010 (9 months)

Food and beverage directors work with a variety of staff members in a fast-paced environment, they must be excellent communicators with the ability to multitask and think quickly when under pressure. Just like many other positions in the hospitality industry, the job of food and beverage director requires working long and perhaps erratic hours, which may include nights, weekends and holidays. Coupled with long hours, there is a great deal of physical exertion expected of a food and beverage director. They must be on their feet for a majority of the day, and there may be moderate to heavy lifting involved.

JMJ Group
Food and Beverage Executive
September 2008 - April 2009 (8 months)

Alongside other members of a culinary management team, food and beverage executives create and maintain menus that satisfy guests. They are responsible for managing food costs, upholding menu standards and controlling inventory. Food and beverage directors create event-specific menus for occasions such as banquets, conventions and catered meetings.

In addition to menu maintenance and event management, food and beverage executives are involved with all of a full-service hospitality establishments'

day-to-day functions, including staff management, guest interactions, office administration duties, vendor communications and labor costs. They oversee the management of staff and may address issues that lower levels of management are unable to resolve. They are required to ensure that operational standards are met in regards to sanitation codes and laws, food storage and loss prevention.
